

Bereavement Care for Hospice Volunteers

By: Pat Carver

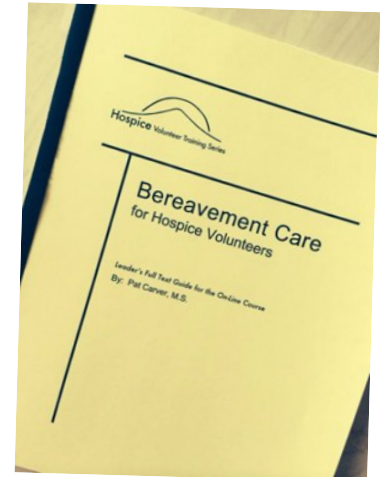

Additional training beyond New Volunteer Orientation is required for Hospice Volunteers wishing to serve with their program's Bereavement Team.

Our new Course provides the foundation needed, making it not only easier and more convenient to train individuals for bereavement work, but also insures that foundational training is consistent for each bereavement care volunteer.

The Hospice builds upon the foundation provided through our e-learning course and follows up with face to face interactions insuring that each learner is prepared for this specialized role.

Leader's Guide for Bereavement Care Course
